

REMARKS

Reconsideration of the application is respectfully requested in view of the above provisional election.

The present invention is directed to a cold extruded composition having a higher ratio of liquids fat to solid fat at the processing temperature, to the method of making the confection and to an apparatus suitable for making the confection. Since the claims are interrelated, it is respectfully submitted that it would not be unduly burdensome for the Office to examine all of them in the same application.

Respectfully submitted,

Gerard J. McGowan, Jr.
Attorney for Applicant(s)
Reg. No. 29,412
